Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Emerging Market Debt Sustainable and Responsible Investment Fund, a US Dollar denominated sub fund of the Standard Life Investments Global SICAV II, Class B Accumulation Shares (ISIN:LU1971930778). Aberdeen Standard Investments Luxembourg S.A. is the Management Company.

Objectives and Investment Policy

The fund aims to generate income and growth over the long term by investing in bonds.

It will seek to achieve this objective primarily through investment in US Dollar denominated interest bearing securities including sovereign and supranational issued bonds as well as sub-investment grade bonds, all issued by Asian, Eastern European, Middle Eastern, African or Latin American countries. All Sovereign and Supranational bonds will meet our internal sustainable and responsible criteria with a screening process which has been designed to incorporate Environment, Social, Governance and Political factors. In addition, the fund may hold sovereign bonds and other bonds issued in non-emerging market countries around the world that meet this criteria, as well as derivative instruments. The fund may also invest in funds (including those managed by Aberdeen Standard Investments) and money-market instruments including cash on an ancillary basis.The fund is actively managed by the investment team who seek to take advantage of opportunities they have identified through direct investment or derivatives. The fund's holdings will typically consist of individual bonds but derivatives (including bond futures, interest rate, inflation and credit default swaps as well as currency forwards) may be used to gain or reduce (hedge) exposure and seek investment gains.

The fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different to those that could be achieved through investment in assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

Any income, for example interest income, received by the fund will be reinvested.

Investors in the fund may buy and sell shares on any normal business day.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

Risk and Reward Profile

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

1	2	3	**4**	5	6	7

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

As the share class does not have a history of five years, an alternative share class, a comparable fund or a representative benchmark has been used to show how the share class price may have behaved over the period.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes.

The lowest rating does not mean risk free.

The fund is rated as {4} because of the extent to which the following risk factors apply:

(a) The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.

(b) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

(c) The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

(d) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.

(e) The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.

The fund employs a single swinging pricing methodology to protect against the dilution impact of transaction costs. A change in the pricing basis will result in movement in the fund's published price.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Charges

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One off charges taken before or after you invest	
Entry charge:	5,00%
Exit charge:	0,00%

This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out.

Charges taken from the fund over a year	
Ongoing charges:	0,98%

Charges taken from the fund under certain specific conditions	
Performance Fees:	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

As this share class was launched on 15/4/2019 the ongoing charges figure here is an estimate as insufficient data is currently available. The ongoing charges figure would ordinarily be based on expenses incurred in the previous calendar year. The UCITS' annual report for each financial year will include detail on the actual charges made. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

A switching charge of 0,5% may apply in exceptional circumstances if you move your investment to another Standard Life Investments Global SICAV II fund.

For more information about charges, please see the following sections in the Prospectus: Issuing and Company Charges; Redemption of Shares which is available at www.standardlifeinvestments.com.

Past Performance

There is insufficient data to provide a useful indication of past performance to this fund's investors.

The fund was launched in 2019. The share class was launched in 2019.

The fund does not have an index-tracking objective.
