

For investment professionals.

Reasons Why

Conventional Managed Portfolio Service

Aberdeen Standard Capital's Managed Portfolio Service (MPS) is a comprehensive investment solution. It offers risk-based portfolios in a choice of investment styles so you can choose the one that's right for your clients.

MPS uses the expertise and research capabilities of Aberdeen Standard Capital and Aberdeen Standard Investments*. Your clients have access to the same investment approach as that used by Aberdeen Standard Capital's full discretionary service, while you retain full control of the client relationship.

Portfolios are fully diversified and because they're managed on a discretionary basis, they can respond quickly to changing market conditions.

Aberdeen Standard Capital Conventional MPS

Is a range of discretionary portfolios that can offer your clients the potential for income, growth or a mix of both. The range may be attractive if your clients are looking for:

- **an income-generating portfolio** – MPS Conventional offers portfolios which have the potential to deliver varying levels of income as well as the potential for some capital growth
- **the potential for capital growth** – The portfolios aim to help preserve capital while seeking to generate growth. Whilst the portfolios do not offer guarantees against loss, they can help manage the effects of market volatility to seek returns which are consistently smoother than traditional balanced or equity funds
- **a highly diversified approach** – Conventional MPS Portfolios are highly diversified and feature a broad range of asset classes and structures.

Managed by experts

Conventional MPS gives clients access to the portfolio construction and risk management skills of Aberdeen Standard Capital's investment experts.

- **Asset allocation** – Aberdeen Standard Capital's Investment Team combines independent strategic asset allocation input from Moody's Analytics with tactical insights from the Aberdeen Standard Investments* Multi-Asset Investing Team.
- **Fund selection** – is managed by Aberdeen Standard Capital's Investment Team. The approach uses a blend of active and passive options. This is dependent on the Investment Team's view of which asset classes and managers have the potential to outperform passive, lower-cost solutions. The investment process combines insights from face-to-face meetings with leading fund managers and research from Aberdeen Standard Investments' Fund Solutions Team.

It's easy: by choosing MPS for your clients, you can delegate day-to-day management of their investments to us, leaving you free to manage the relationship.

MPS has the maximum five star rating from Defaqto.

*Aberdeen Standard Investments is a brand of the investment businesses of Aberdeen Asset Management and Standard Life Investments.

Important Information

The value of an investment is not guaranteed and can go down as well as up. An investor may get back less than they invested.
