

Managed Portfolio Service Costs and Charges Information

Aberdeen Standard Capital charge and other fees

The information on the next pages provide you with expected costs and charges information that could apply to your portfolio. Please note the illustration below does not include adviser, Wrap platform or product charges.

Aberdeen Standard Capital Discretionary Investment Management Charge			
Managed Portfolio Service Portfolio	Initial Amount invested	Discretionary Investment Management Charge p.a.	Estimated First Year Total Costs and Charge
Target Return Investment Strategy 5	£100,000	0.300%	1.171%

Our Discretionary Investment Management Charge for a total investment of £100,000 would be 0.300% p.a. or £300 per annum. The total cost payable in the first year is estimated to be 1.171% p.a. or £1,171.

Figures are indicative and to ease comparison, assume the amount invested remains valued at £100,000. The amounts payable will be variable based on factors including, but not limited to, the value of the portfolio, portfolio constituents throughout the period, custody and administration charges and any relevant third party costs and local taxes.

Costs and charges information

For illustration purposes the impacts of fees and charges per annum has been provided for the first year and subsequent years of investment. Please note; where possible Aberdeen Standard Capital has used actual costs incurred based on the portfolio composition as at October 2018 as a proxy for the expected fees and charges. Where actual costs are not available, reasonable estimations of these costs have been assumed. The total charges deducted will have an impact on the investment return you might get. Detailed below are the Costs and Charges descriptions:

- [1] **Aberdeen Standard Capital Discretionary Investment Management Charge:** based on the total assets held in your MPS portfolio and deducted quarterly in arrears.
- [2] **Ongoing Fund Charges:** when Aberdeen Standard Capital invests in funds on your behalf, fund charges will apply (which include annual management charges plus additional fund expenses) based on the funds held within each portfolio.
- [3] **Fund Transaction Costs:** there will be third party costs and market-based charges or taxes incurred when a trade is made within a fund such as dilution levies, stamp duty, broker commission.
- [4] **Total Aggregated Costs:** this is the total of the underlying fund costs and the Aberdeen Standard Capital Discretionary Investment Management Charge.

	3rd party payments received	£0	0.000%	£0	0.000%

Ref	Costs and charges breakdown	First Year of Investment		Subsequent Years	
		£ Costs	% p.a.	£ Costs p.a.	% p.a.
	Initial portfolio size £100,000				
	Product costs				
	One-off fund charges	£0	0.000%	£0	0.000%
[2]	On-going fund charges	£631	0.631%	£631	0.631%
[3]	Transaction costs levied by third parties	£240	0.240%	£240	0.240%
	Incidental costs	£0	0.000%	£0	0.000%
	Total Product Costs	£871	0.871%	£871	0.871%
[4]	Total Aggregated Costs	£1,171	1.171%	£1,171	1.171%

Assumes zero % portfolio growth.

[1] The on-going charges in the table above represents the Aberdeen Standard Capital Discretionary Management Charge of 0.300% p.a.

The cumulative effect of costs on return

The example below is based on you investing £100,000. The total charges deducted for the portfolio will have an impact on the investment return you will get. The table below illustrates the effect that charges have when comparing the expected return before and after fees.

Past performance is not a guide to future performance. The value of investments may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

	Year 1		Year 0 to 5	
	£ Value	%	£ Value	%
Total portfolio size £100,000				
What you might get back if no charges at all	£104,074	4.070%	£122,100	22.100%
What you might get back after charges	£102,864	2.860%	£115,153	15.150%
Cumulative effect of costs & charges on return	£1,210	1.210%	£6,946	6.950%

Assumptions:

- £100,000 initial investment
- No additional investment or withdrawals
- An illustrative 4% p.a. gross portfolio return performance
- Holding period 5 years
- Zero entry and exit charges at portfolio level
- ASC discretionary mgmt charge deducted quarterly in arrears
- Other charges deducted monthly in arrears

In Year 1, without fees the performance you could have achieved would be 4.070%, after fees the performance achieved is 2.860%. This equates to a reduction in return of £1,210.

Over 5 years, without fees the performance you could have achieved would be 22.100%, after fees the performance achieved is 15.150%. This equates to a reduction in return of £6,946.
