## June 2020 Performance Data and Portfolio Composition

### Geographic Exposure (%)<sup>c</sup>

<sup>c</sup> Compositions are subject to change. Figures may not appear to sum due to rounding. The following table summarizes the composition of the Fund's portfolio, expressed as a percentage of total assets.

### Active Share<sup>H</sup>

Active Share	Active Share Change
54.59	0.41

<sup>H</sup> Active Share is a holdings-based measure of active management representing the percentage of a portfolio that differs from a benchmark index. A vehicle with an Active Share of 0 would hold exactly the same portfolio as the benchmark index, while a vehicle with an Active Share of 100 would have no holdings in common with the benchmark.

### Important information

Aberdeen Standard Investments Inc. has prepared this report based on information sources believed to be accurate and reliable. However, the figures are unaudited and neither the Fund, its investment adviser, nor any other person guarantees their accuracy. Investors should seek their own professional advice and should consider the investment objectives, risks, charges and expenses before acting on this information.

The FTSE EPRA/NAREIT Global Index is a total return index that is designed to represent general trends in eligible real estate equities worldwide. Indexes are unmanaged and have been provided for comparison purposes only. No fees or expenses are reflected. You cannot invest directly in an index.

### Important risk disclosure

All performance shown is historical, assumes reinvestment of all dividends and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so when sold, shares may be worth more or less than that of the original cost. Total return based on market price reflects changes in market value. Total return based on net asset value reflects changes in the fund's net asset value during each period. Current performance may be lower or higher than the performance data quoted. This commentary is for informational purposes only, and is not intended as an offer or recommendation with respect to the purchase or sale of any security, option, future or other derivatives in such securities.

Closed-end funds are traded on the secondary market through one of the stock exchanges. The Fund's investment return and principal value will fluctuate so that an investor's shares may be worth more or less than the original cost. Shares of closed-end funds may trade above (a premium) or below (a discount) the net asset value (NAV) of the fund's portfolio. The Net Asset Value (NAV) is the value of an entity's assets less the value of its liabilities. The Market Price is the current price at which an asset can be bought or sold. There is no assurance that the Fund will achieve its investment objective. Past performance does not guarantee future results.

The information presented was prepared and issued by the Fund based on publicly available information, internally developed data and other sources believed to be reliable. All reasonable care has been taken to ensure accuracy.

International investing entails special risk considerations, including currency fluctuations, lower liquidity, economic and political risks, and differences in accounting methods; these risks are generally heightened for emerging market investments. Equity stocks of small and mid-cap companies carry greater risk, and more volatility than equity stocks of larger, more established companies. Dividends are not guaranteed and a company's future ability to pay dividends may be limited. The use of leverage will also increase market exposure and magnify risk. Because the real estate funds concentrate their investments in the real estate industry, the portfolio may experience more volatility and be exposed to greater risk than the portfolios of many other mutual funds. Risks associated with investment in securities of companies in the real estate industry may include: declines in the value of real estate, overbuilding and increased competition; increases in property taxes and operating expenses; changes in zoning laws; casualty or condemnation losses; variations in rental income, neighborhood values, changes in interest rates and changes in economic conditions.
