R-Squared	0.96	0.92

Source: Aberdeen Standard Investments, Total Return, Gross of Fees, BPSS, Datastream, US\$. Please note the risk analytics figures are calculated on gross returns whereas the performance figures are based on net asset value (NAV) returns. In addition, the risk analytics figures lag the performance figures by one month. It should be noted that the figures provided regarding risk would be adjusted if fund fees and expenses were included.

Standard deviation measures historical volatility. Beta is a measure of the volatility of a portfolio in comparison to a benchmark index. Sharpe ratio measures risk-adjusted performance. Tracking error measures the divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark. Information ratio is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns. R-squared is a statistical measurement that determines the proportion of a fund's return that can be explained by variations in the market, as measured by a benchmark index.

Important information

The Fund is a sub-fund of Aberdeen Global, a Luxembourg-registered open-ended investment company with variable capital (organized as a société d'investissement à capital variable or SICAV) with UCITS status. Aberdeen Global, being the responsible person of the Fund, has appointed Aberdeen Standard Investments (Asia) Limited ('ASI Asia') as its Singapore representative.

The information in this document should not be considered as an offer, or solicitation, to deal in any funds. The information is provided on a general basis for information purposes only, and is not to be relied on as investment, legal, tax or other advice as it does not take into account the investment objectives, financial situation or particular needs of any specific investor.

Investments in the fund(s) are not deposits in, obligations of, or guaranteed or insured by ASI Asia, and are subject to investment risks, including the possible loss of the principal amount invested. Share values and income therefrom may fall or rise. Past performance is not necessarily indicative of future performance.

Investor should read the Singapore prospectus and the product highlights sheet or seek relevant professional advice, before making any investment decision. The Singapore prospectus is available and can be obtained from ASI Asia or its website at <http://www.aberdeenstandard.com/singapore/investor> or any of its appointed distributors in Singapore.

The Fund may use or invest in financial derivatives instruments. Please refer to the Singapore prospectus for more information. Dividend distributions are not guaranteed and may be subject to fluctuations. You should note that the Fund may have a higher volatility due to their investment policies or portfolio management techniques.

The above is based on information available as at 30 Nov 2018, unless otherwise stated. Aberdeen Global reserves the right to make any amendments to the information at any time, without notice.

Fund Statistics

Modified duration vs benchmark	4.5 vs 4.5
Weighted average life vs benchmark	6.0 vs 6.4
Yield to maturity vs benchmark (%)	6.9 vs 6.3

Yield to Maturity is the yield that would be realized on a bond or other debt instrument if the security was held until the maturity date. Modified duration measures the change in the value of a security in response to a change in interest rates. The higher the duration, the greater the change (i.e., higher risk) in relation to interest-rate movements.
