

31 March 2021

The fund aims to provide long term growth mainly from the reinvestment of income generated by investing predominantly in the sterling bond market. The fund is actively managed by our investment teams around the long term strategic asset allocation of 60% in non-gilt, sterling bonds and 40% in long dated (over 15 year) gilts. They may also invest a proportion of assets in other bonds such as, but not exclusively, overseas government bonds, index-linked bonds, floating rate notes (FRNs) and/ or money market instruments in order to take advantage of opportunities they have identified.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The Fund and its holdings may use derivatives for the purpose of efficient portfolio management, reduction of risk or to meet its respective investment objective if this is permitted and appropriate. The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.
