

# Aberdeen Standard Capital (Offshore) Global Equity Fund

## Quarterly Performance Data and Analytics to 30 June 2021

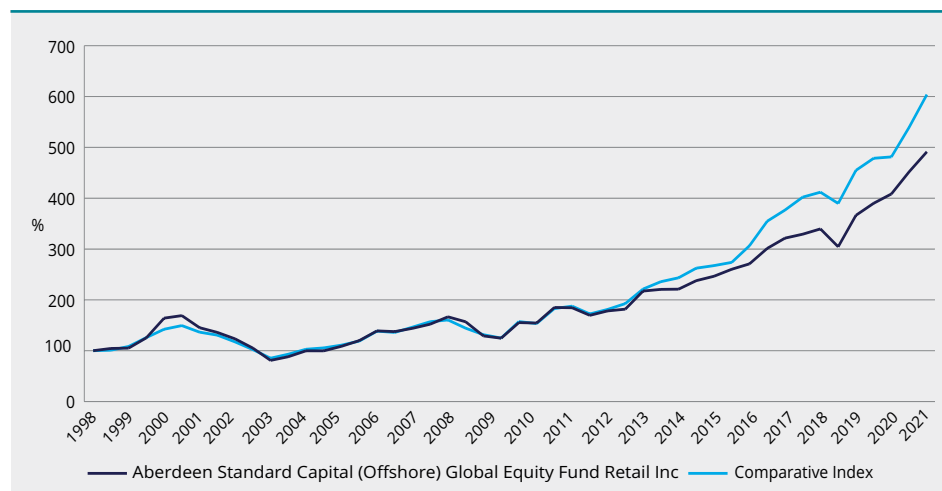

### Fund Description

The fund aims to provide investors with long term capital growth together with an element of income by investing primarily in a diversified portfolio of global equity assets. The investment team will maintain a diverse asset mix at country, sector and stock level, with the regional, country and sector weightings within the portfolio being a by-product of the underlying stock exposure. Their primary focus is on stock selection to try to take advantage of opportunities they have identified. Due to the unconstrained nature of the fund investors must be willing to accept a relatively high degree of stock specific risk. It will invest in companies of all sizes (eg small, medium and large companies) and in any

industry (eg pharmaceuticals, financials etc) with complete freedom to invest without reference to any benchmark or index. Additionally the fund will typically invest in fewer than 70 company shares and limit investment in other mutual funds to 10%.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate. The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.

### Performance\*

The performance of the fund\*\* has been calculated using bid to bid basis, based on an Annual Management Charge (AMC) of 1.00%, gross income re-invested and excludes initial charges. The Comparative Index performance is on a Total Return basis.

\*\* Aberdeen Standard Capital (Offshore) Global Equity Fund Retail Inc

\*\*\* Institutional refers to Z shareclass

The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the Fund. It is made up of the Annual Management Charge (AMC) shown above and the other expenses taken from the Fund over the last annual reporting period. It does not include any initial charges or the cost of buying and selling stocks for the Fund. The OCF can help you compare the costs and expenses of different funds.
