Important information overleaf

Aberdeen Liquidity Fund (Lux) - Sterling Fund

Important information

Risk factors you should consider before investing:

- The value of shares and the income from them can go down as well as up and your clients may get back less than the amount invested.
- The Fund invests in money market instruments and changing market conditions and interest rate levels may affect the value of your clients investment. Generally, the value of money market instruments is likely to fall when interest rates rise and increase in value when interest rates fall. Money market instruments that produce a higher level of income usually also carry greater risk as issuers may not be able to pay the income as promised or could fail to repay the capital amount used to purchase the investment.

Other Important information:

For Professional Investors Only - Not for Use by Retail Investors or Advisers
