Important: Leverage is presented as of the date shown. Current leverage may differ from what is shown above as markets may have changed the value of underlying assets. Leverage will be updated on a periodic basis. The Company’s use of leverage exposes the Company to additional risks, including the risk that the costs of leverage could exceed the income earned by the Company on the proceeds of such leverage. Additionally, in the event of a general market decline in the value of the Company’s assets, the effect of that decline will be magnified in the Company because of the additional assets purchased with the proceeds of the leverage.
