## What does MyFolio Multi-Manager invest in?

Our experts invest in what we believe to be some of the best available funds from leading asset managers across the globe, combining defensive and growth asset classes. Defensive assets are usually seen as less risky, including funds that typically hold investments such as cash and bonds. Meanwhile, growth assets are usually seen as more risky, including funds that typically

hold investments such as company shares and property. By combining different types of investment, we believe we can achieve the best possible return for each risk level.

Defensive

Growth

As you move up the risk levels, you would typically expect to see a higher proportion invested in growth assets and less in defensive assets.
