

Aberdeen Global Income Fund, Inc.

May 2020 Performance Data and Portfolio Composition

Investment objective and policies

The Fund's principal investment objective is to provide high current income by investing primarily in fixed income securities. As a secondary investment objective, the Fund seeks capital appreciation, but only when consistent with its principal investment objective.

Performance

The latest available performance figures have been calculated net-of-fees in U.S. dollars for the period ending May 31, 2020:

Total return as of May 31, 2020^a (%)

NAV	Cumulative	Annualized	Market price	Cumulative	Annualized
Since inception (March 1992)	421.3	6.0	Since inception	343.3	5.4
Ten years	34.9	3.0	Ten years	29.3	2.6
Five years	3.9	0.8	Five years	7.4	1.5
Three years	-5.5	-1.9	Three years	-8.1	-2.8
One year	-8.2		One year	-16.3	

^a Past performance is no guarantee of future results. Investment returns and principal value will fluctuate and shares, when sold, may be worth more or less than original cost. Current performance may be lower or higher than the performance data quoted. NAV return data includes investment management fees, custodial charges, bank loan expenses and administrative fees (such as Director and legal fees) and assumes the reinvestment of all distributions. The Fund is subject to investment risk, including the possible loss of principal. Returns for periods less than one year are not annualized.

Important risk disclosure

All performance shown is historical, assumes reinvestment of all dividends and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so when sold, shares may be worth more or less than that of the original cost. Total return based on market price reflects changes in market value. Total return based on net asset value reflects changes in the fund's net asset value during each period. Current performance may be lower or higher than the performance data quoted. This commentary is for informational purposes only, and is not intended as an offer or recommendation with respect to the purchase or sale of any security, option, future or other derivatives in such securities.

Closed-end funds are traded on the secondary market through one of the stock exchanges. The Fund's investment return and principal value will fluctuate so that an investor's shares may be worth more or less than the original cost. Shares of closed-end funds may trade above (a premium) or below (a discount) the net asset value (NAV) of the fund's portfolio. The Net Asset Value (NAV) is the value of an entity's assets less the value of its liabilities. The Market Price is the current price at which an asset can be bought or sold. There is no assurance that the Fund will achieve its investment objective. Past performance does not guarantee future results.

International investing entails special risk considerations, including currency fluctuations, lower liquidity, economic and political risks, and differences in accounting methods; these risks are generally heightened for emerging market investments. Concentrating investments in the Asia-Pacific region subjects the Fund to more volatility and greater risk of loss than geographically diverse funds. Fixed income securities are subject to certain risks including, but not limited to: interest rate (changes in interest rates may cause a decline in the market value of an investment), credit (changes in the financial condition of the issuer, borrower, counterparty, or underlying collateral), prepayment (debt issuers may repay or refinance their loans or obligations earlier than anticipated), and extension (principal repayments may not occur as quickly as anticipated, causing the expected maturity of a security to increase).

Important information

Aberdeen Standard Investments Inc. has prepared this report based on information sources believed to be accurate and reliable. However, the figures are unaudited and neither the Fund, its investment adviser, nor any other person guarantees their accuracy. Investors should seek their own professional advice and should consider the investment objectives, risks, charges and expenses before acting on this information.

Past performance does not guarantee future results.

Aberdeen is a U.S. registered service mark of Aberdeen Asset Management PLC.

The Fund's use of leverage exposes the Fund to additional risks, including the risk that the costs of leverage could exceed the income earned by the Fund on the proceeds of such leverage.

Additionally, in the event of a general market decline in the value of the Fund's assets, the effect of that decline will be magnified in the Fund because of the additional assets purchased with the proceeds of the leverage.

Developed Markets are those countries contained in the Citigroup World Government Bond Index, New Zealand, Luxembourg and the Hong Kong Special Administrative Region.

Investment Grade Developing Markets are those countries whose sovereign debt is rated not less than Baa3 by Moody's Investors Services Inc. ("Moody's") or BBB- by Standard & Poor's ("S&P") or comparably rated by another appropriate nationally or internationally recognized ratings agency.

Sub-Investment Grade Developing Markets are those countries that are not Developed Markets or Investment Grade Developing Markets.

Portfolio duration is calculated as the weighted average of the individual securities' duration. The source for the duration figures is Yieldbook and Aberdeen Standard Investments Inc. as of the most recent month end.
