

Volare Bridge Offshore Fund

Quarterly Performance Data and Analytics

31 March 2024

Fund Description

The objective of the fund is to achieve capital growth together with an element of income through investment primarily in international equities and fixed interest securities. Although this fund will normally be invested in securities, the Investment Manager may elect to hold cash or near cash from time to time. There will be no limits on the proportion of the class fund invested in bonds or equities or in any one geographic region.

The value of investments within the fund can fall as well as rise and is not guaranteed – you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate. The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.

Performance %

The performance of the fund* has been calculated using bid to bid basis, based on an Annual Management Charge (AMC) of 0.65%, gross income re-invested and excludes initial charges. The Comparative Index performance is on a Total Return basis.

* Volare Bridge Offshore Fund Retail Inc

The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the Fund. It is made up of the Annual Management Charge (AMC) shown above and the other expenses taken from the Fund over the last annual reporting period. It does not include any initial charges or the cost of buying and selling stocks for the Fund. The OCF can help you compare the costs and expenses of different funds.

This document is intended for use by individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used.

For a full explanation of specific risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website www.lgtwm.com

Key Risks

(a) The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.

(b) The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.

(c) The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.

(d) Emerging markets are countries generally considered to be relatively less developed or industrialized, and investments in emerging markets countries are subject to a magnification of the risks that apply to foreign investments. These risks are greater for securities of companies in emerging market countries because the countries may have less stable governments, more volatile currencies and less established markets.

(e) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

(f) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
