Important Risk Disclosure

All performance shown is historical, assumes reinvestment of all dividends and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so when sold, shares may be worth more or less than that of the original cost. Total return based on market price reflects changes in market value. Total return based on net asset value reflects changes in the Fund's net asset value during each period. Current performance may be lower or higher than the performance data quoted. This commentary is for informational purposes only, and is not intended as an offer or recommendation with respect to the purchase or sale of any security, option, future or other derivatives in such securities.

Closed-end funds are traded on the secondary market through one of the stock exchanges. The Fund's investment return and principal value will fluctuate so that an investor's shares may be worth more or less than the original cost. Shares of closed-end funds may trade above (a premium) or below (a discount) the net asset value (NAV) of the Fund. The net asset value (NAV) is the value of an entity's assets less the value of its liabilities. The market price is the current price at which an asset can be bought or sold. There is no assurance that the Fund will achieve its investment objective. Past performance does not guarantee future results.

The information presented was prepared and issued by the Fund based on publicly available information, internally developed data and other sources believed to be reliable. All reasonable care has been taken to ensure accuracy.

Foreign securities are more volatile, harder to price and less liquid than U.S. securities. They are subject to different accounting and regulatory standards, and political and economic risks. These risks are enhanced in emerging markets countries. Equity stocks of small and mid-cap companies carry greater risk, and more volatility than equity stocks of larger, more established companies. Dividends are not guaranteed and a company's future ability to pay dividends may be limited.

The Fund's use of leverage exposes the Fund to additional risks, including the risk that the costs of leverage could exceed the income earned by the Fund on the proceeds of such leverage. Additionally, in the event of a general market decline in the value of the Fund's assets, the effect of that decline will be magnified in the Fund because of the additional assets purchased with the proceeds of the leverage.
