

31 March 2021

The fund aims to provide long term growth mainly from the reinvestment of income generated by investing predominantly in Sterling denominated corporate bonds. The fund is actively managed by our investment team who may also invest a proportion of assets in other bonds (e.g. overseas bonds and gilts) and/or money market instruments to try to take advantage of opportunities they have identified.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate. The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.
