Important risk disclosure

Aberdeen Standard Investments is a brand of the investment businesses of Aberdeen Asset Management and Standard Life Investments.

All performance shown is historical, assumes reinvestment of all dividends and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so when sold, shares may be worth more or less than that of the original cost. Total return based on market price reflects changes in market value. Total return based on net asset value reflects changes in the fund's net asset value during each period. Current performance may be lower or higher than the performance data quoted. This commentary is for informational purposes only, and is not intended as an offer or recommendation with respect to the purchase or sale of any security, option, future or other derivatives in such securities.

Portfolio duration is calculated as the weighted average of the individual securities' duration. The source for the duration figures is Yieldbook and Aberdeen Asset Management, Inc. as of the most recent month end.

Closed-end funds are traded on the secondary market through one of the stock exchanges. The Fund's investment return and principal value will fluctuate so that an investor's shares may be worth more or less than the original cost. Shares of closed-end funds may trade above (a premium) or below (a discount) the net asset value (NAV) of the fund's portfolio. The Net Asset Value (NAV) is the value of an entity's assets less the value of its liabilities. The Market Price is the current price at which an asset can be bought or sold. There is no assurance that the Fund will achieve its investment objective. Past performance does not guarantee future results.

International investing entails special risk considerations, including currency fluctuations, lower liquidity, economic and political risks, and differences in accounting methods; these risks are generally heightened for emerging market investments. Concentrating investments in the Asia-Pacific region subjects the Fund to more volatility and greater risk of loss than geographically diverse funds. Fixed income securities are subject to certain risks including, but not limited to: interest rate (changes in interest rates may cause a decline in the market value of an investment), credit (changes in the financial condition of the issuer, borrower, counterparty, or underlying collateral), prepayment (debt issuers may repay or refinance their loans or obligations earlier than anticipated), and extension (principal repayments may not occur as quickly as anticipated, causing the expected maturity of a security to increase).

Important information

Under U.S. tax rules applicable to the Fund, the amount and character of distributable income for each fiscal year can be finally determined only as of the end of the Fund's fiscal year. The Fund anticipates that sources of distributions to shareholders may include net investment income, net realized short-term capital gains, net realized long-term capital gains and return of capital. The estimated composition of the distributions may vary from time to time because the estimated composition may be impacted by future income, expenses and realized gains and losses on securities. For more detailed information related to the composition of the Fund's distributions, see aberdeenFAX.com.

Aberdeen Asset Management Inc., the Fund's Administrator, has prepared this report based on information sources believed to be accurate and reliable. All reasonable care has been taken to ensure accuracy. However, the figures are unaudited and neither the Fund, the Administrator, Aberdeen Asset Management Asia Limited (the Investment Manager), Aberdeen Asset Management Limited (the Investment Adviser), Aberdeen Asset Managers Limited (the Sub-Adviser), nor any other person guarantees their accuracy. Investors should seek their own professional advice and should consider the investment objectives, risks, charges and expenses before acting on this information.
