KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of abrdn SICAV I (the “**Company**”), an open-ended investment company with the legal status of a SICAV incorporated in Luxembourg and qualifying as a UCITS under the Luxembourg law concerning undertakings for collective investment dated 17 December 2010.
- The Sub-Fund’s investment objective is long term total return.
- Income Shares (Class A Minc USD Shares and Class A Minc Hedged SGD Shares) will declare and distribute dividends. In respect of Accelerated Income Shares, such distributions to be made on an accelerated basis at the discretion of abrdn SICAV I, such that the appropriate distributions or allocations will be made in under one month of the relevant declaration date. **Please note that dividends declared and distributed will reduce the Net Asset Values of the Income Shares and Accelerated Income Shares.**
- Accumulation Shares (Class A Acc USD Shares and Class A Acc Hedged SGD Shares) will declare, but do not intend to distribute, any dividends in respect of these Classes of Shares. Accordingly, the dividends attributable to these Classes of Shares will be accumulated in their respective Net Asset Values.
- Hedged Share Classes (which will include “Hedged” and the relevant currency in their name) seek to mitigate against fluctuations in the exchange rate of the hedged currency of the Share Class (the currency of the Share Class a Shareholder invests in) relative to the particular Base Currency of the Sub-Fund.

Refer to “abrdn SICAV I” and “The Sub-Funds” of the Prospectus for further information on features of the product.

¹ The Prospectus is available at the offices of the distributors during normal business hours.

INVESTMENT STRATEGY	
<ul style="list-style-type: none"> The Sub-Fund will invest at least two-thirds of the Sub-Fund's assets in Debt and Debt-Related Securities which are issued by corporations (including government-owned corporations) with their registered office or principal place of business in a CEMBI Emerging Market; and/or by corporations which carry out the preponderance of their business activities (as determined by the Investment Manager) in a CEMBI Emerging Market; and/or by holding companies that have the preponderance of their assets invested in corporations with their registered office in a CEMBI Emerging Market and/or the preponderance of their business activities (as determined by the Investment Manager) in a CEMBI Emerging Market) as at the date of investment. 	Refer to "Investment Objective, Policy and Strategy" of the Prospectus for details of the investment strategy of the Sub-Fund.
PARTIES INVOLVED	
WHO ARE YOU INVESTING WITH? <ul style="list-style-type: none"> The umbrella fund under which the Sub-Fund is constituted is abrdn SICAV I i.e. the "Company". The Management Company is abrdn Investments Luxembourg S.A., the Investment Manager is abrdn Investments Limited. The Depositary Bank of the Sub-Fund's assets is Citibank Europe plc, Luxembourg Branch. The Singapore Representative is abrdn Asia Limited. 	Refer to "abrdn SICAV I", "Management", "Other Parties" and "Insolvency of Parties" of the Prospectus for further information on the roles and responsibilities of these entities and what happens if they become insolvent.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The price of Shares and any income from them may fall as well as rise and you may not get the full amount invested. These risk factors may cause you to lose some or all of your investment.	Refer to "Risk Factors" of the Prospectus for further information on risks of the product.
MARKET AND CREDIT RISKS	
The Sub-Fund may be exposed to Interest Rate Risk and Credit Risk <ul style="list-style-type: none"> The Sub-Fund's underlying investments are subject to interest rate risk and credit risk. Interest rate fluctuations affect the capital value of investments. Where long-term interest rates rise, the capital value of bonds is likely to fall and vice versa. Credit risk reflects the ability of a bond issuer to meet its obligations. 	
LIQUIDITY RISKS	
<ul style="list-style-type: none"> The Sub-Fund is not listed and you can redeem only on a Singapore business day which is also a Dealing Day. The Company may refuse any redemption requests if all relevant documentation has not been submitted, if such redemption would result in non-compliance with the Minimum Holding requirement, or in any other circumstances agreed with the Sub-Fund and notified to you. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner. 	
PRODUCT-SPECIFIC RISKS	
The Sub-Fund may be exposed to Sub-Investment Grade Bonds Risk <ul style="list-style-type: none"> The Sub-Fund's portfolio may have a significant position in Sub-Investment Grade bonds, which means that there may be more risk to investor's capital and income than from a fund investing in Investment Grade bonds. The Sub-Fund may be exposed to Financial Derivative Instruments Risk <ul style="list-style-type: none"> The Sub-Fund may utilise financial derivative instruments for investment purposes in pursuing its investment objective (in addition to use for hedging purposes). Use of derivatives other than for hedging may result in leverage and may increase volatility in the Net Asset Value of the Sub-Fund. The Sub-Fund may have a higher volatility due to its investment policies or portfolio management techniques. The Sub-Fund may be exposed to Emerging Market Risks	

- The Sub-Fund invests in Emerging Markets which tend to be more volatile than mature markets and its value could move sharply up or down. In some circumstances, the underlying investments may become less liquid which may constrain the Investment Manager's ability to realise some or all of the portfolio. The registration and settlement arrangements in Emerging Markets may be less developed than in more mature markets so the operational risks of investing are higher. Political risks and adverse economic circumstances are more likely to arise.

The Sub-Fund may be exposed to Currency Risks

- Performance may be strongly influenced by movements in currency rates because the Sub-Fund may have exposure to a particular currency that is different to the value of the securities denominated in that currency held by the Sub-Fund.
- Where the currency of the Sub-Fund varies from the currency invested, or where the currency of the Sub-Fund varies from the currencies of the markets in which the Sub-Fund invests, you will be exposed to exchange rate risks and there is the prospect of additional loss (or the prospect of additional gain) to the investor greater than the usual risks of investment.
- Singapore investors should note that the Sub-Fund is not denominated in SGD and the Share Classes may not be denominated in SGD. Except the hedged Share Classes, the relevant Investment Manager does not intend to hedge against currency fluctuations between the SGD and that of the currency of account of the Sub-Fund and between the SGD and that of the currency denomination of the Share Classes. Singapore investors may therefore be exposed to this exchange rate risk.

The Sub-Fund may be exposed to Contingent Convertible Bonds Risk

- The Sub-Fund may be invested in contingent convertible bonds. If the financial strength of a bond's issuer falls by a predetermined threshold, the bond may suffer substantial or total losses of capital.

The Sub-Fund may be exposed to ESG Investment Risk

- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities in which the Sub-Fund might otherwise invest. This may have a positive or negative impact on performance and may mean that the Sub-Fund's performance profile differs to that of funds which are managed against the same benchmark or invest in a similar universe of potential investments but without applying ESG or sustainability criteria. Furthermore, the lack of common or harmonised definitions and labels regarding ESG and sustainability criteria may result in different approaches by managers when integrating ESG and sustainability criteria into investment decisions.
