Benchmark history: Performance comparator/Portfolio constraining benchmark - 70% Bloomberg Barclays Worlds Government Inflation Linked ex-UK (1-10 year) (Hedged to GBP), 30% Bloomberg Barclays UK Inflation Linked (1-10 year).

Source: Aberdeen Standard Investments (Fund & Benchmark) & Morningstar (Sector). Basis: Total Return, NAV to NAV, UK Net/Gross Income Reinvested.

*Fund (Net) refers to the actual unit price performance of the shareclass shown; *Fund(Gross) adds back charges such as the annual management charge to present performance on the same basis as performance target / performance comparator / portfolio constraining benchmark. These figures do not include the initial charge; if this is paid it will reduce performance from that shown.

Past performance is not a guide to future returns and future returns are not guaranteed.

Objective: To generate income and some growth over the long term (5 years or more) by investing in inflation-linked bonds with a maturity of up to 10 years.

Performance Target: To achieve the return of the following composite index: 70% Bloomberg Barclays World Government Inflation Linked ex-UK 1-10 years Index (Hedged to GBP) / 30% Bloomberg Barclays UK inflation-linked 1-10 years Index, plus 0.5% per annum (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target. The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the indices.

Important Information

The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested. Past performance is not a guide to future results.

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- More details of the risks applicable to this fund can be found in the Key Investor Information Document (KIID) and Prospectus, both of which are available on request or at our website aberdeenstandard.com

The fund is a sub-fund of Aberdeen Standard OEIC V, an authorised open-ended investment company (OEIC). The Authorised Corporate Director is Aberdeen Standard Fund Managers Limited.
